## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

*Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 6-9 and 11-15, drawn to a plant expressing a cellulase, classified in class 800, subclass 288, for example.
- II. Claims 6-9 and 11-15, drawn to a plant expressing a cellobiohydrolase, classified in class 800, subclass 284, for example.
- III. Claims 6-9 and 11-15, drawn to a plant expressing a cellobiose, classified in class 800, subclass 298, for example.
- IV. Claim 10, drawn to a package, classified in class 47, subclass 65, for example.

Claims 6-9 and 11-15 will be examined to the extent they read on the elected invention.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated to each other. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions have different functions and different effects. The plants of each invention require different genes and would have different phenotypes.

Invention IV is unrelated to inventions I-III. The different inventions have different modes of operation, different functions, and different effects. The plants of inventions I-III require nucleic acids and methods of plant transformation and regeneration, not required by the package of invention IV.

Art Unit: 1638

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, fields of search, and classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
